

ON-SLAB WIRELESS

Minnich on-slab self-propelled wireless units increase drilling efficiency, accuracy and safety. IQAN 24 Volt Wireless remote-control system enables operators to drill up to five holes at once, all while standing in the grade, away from the equipment. From this clear vantage point operators can drill faster and more accurately. Power crab-steering further boosts efficiency by letting operators drive down the slab without raising and lowering the drill bed. The remote's joystick controls speed, steering, direction of travel, and comes with two batteries and charging station.

FEATURES

- Horizontal and Vertical Drilling
- Low Oil Sensor / Indicator
- Crab Steering
- Capable of Towing Air Compressor

OPTIONS

- Skewed Beds
- On-grade Kit
- Dust Collection

SPECIFICATIONS

	4-GANG
Drill Steel Shank Size	.875" x 4.25"
Drill Steel Length	24"
Drill Bit Diameter	.625" - 2.50"
Maximum Hole Depth	18"
Minimum Cutout Width	48"
Distance from Top of Slab	3.5" - 12"
Required SCFM	368.8
Required PSIG	120
Weight	3260 LBS
